100 million negative ions

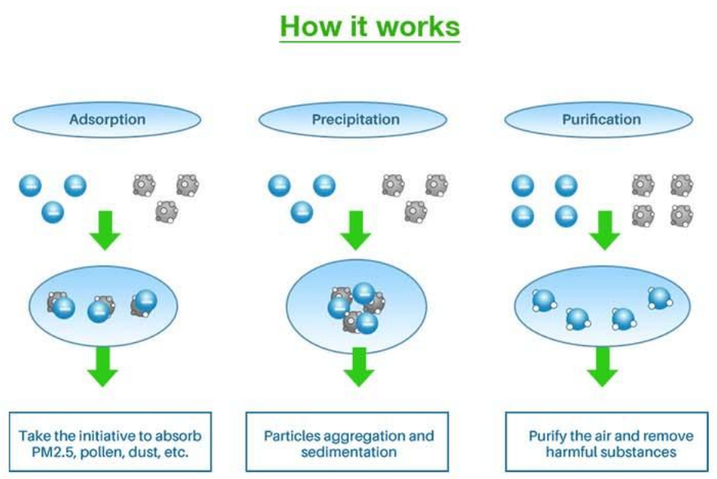
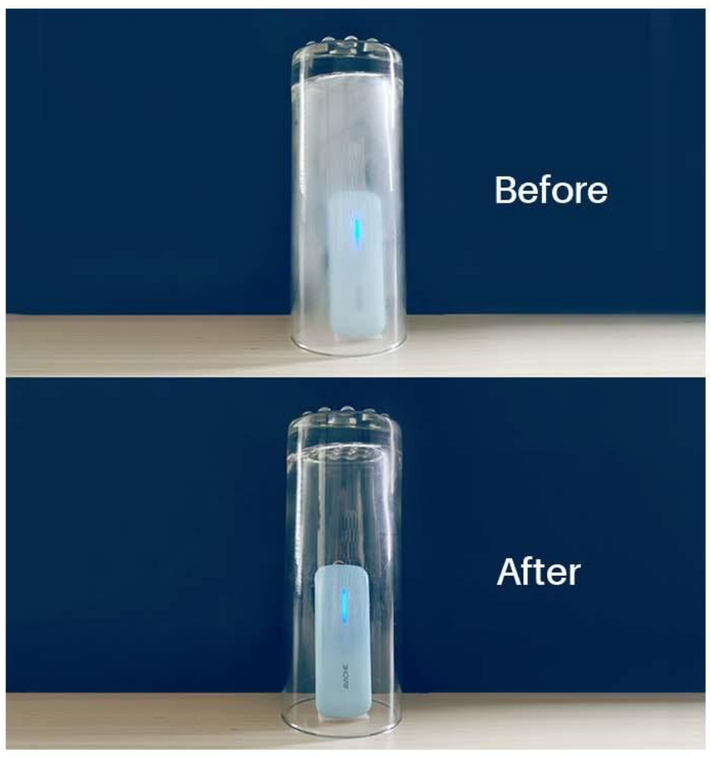
Negative ions can absorb suspended particles in the air, so that these suspended particles atract each other, become bigger and heavier, thus accelerating landing

The continuous use of 100 milion/cm^3 negative ion can efectively reduce the number of suspended particles, such as forming a stealth mask. Inhale suspended dirt toavoid dirty air hazards.

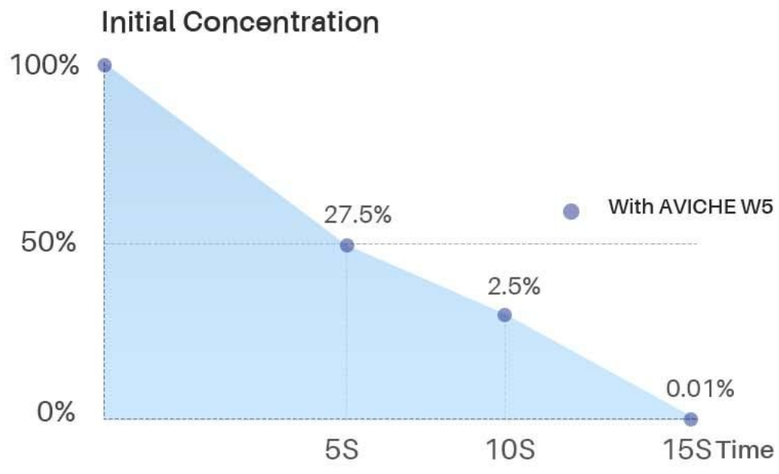




Faster Purification

It only takes less than 10s to quickly purify smoke and other pollutants, with obvious effects

PM2.5 Bacteria Pollen Second Smoke Dust



30-35 Hours

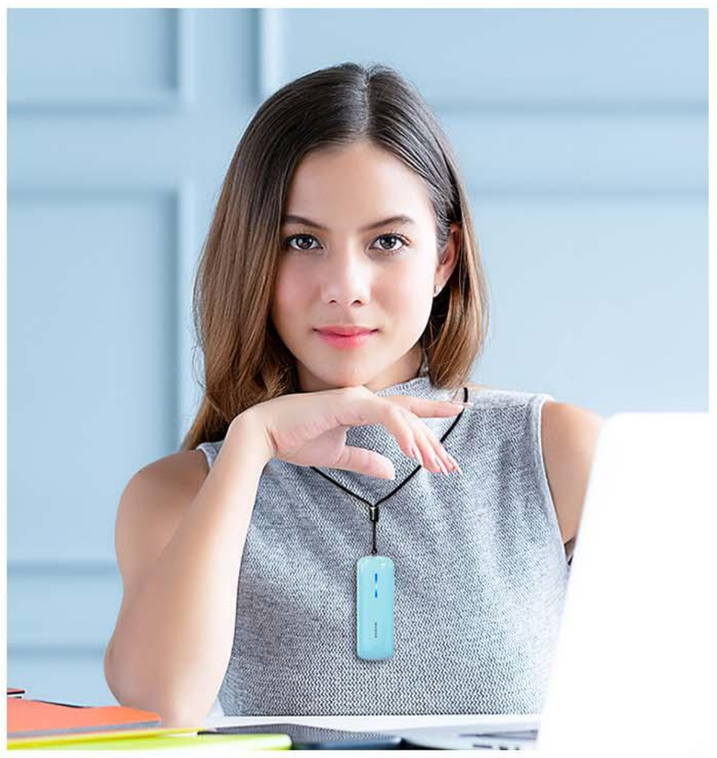
W5 can switch between high and low gears. It can work for 30-35 hours in low gear and 20-25 hours in high gear

Working
blue light turns on

Charging
Red light turns on

1m^3 Fresh Air

Negative ions diffuse around the human body and form a protective layer of 1m3 around to provide fresh and safe air.



Product Name	Wearable air purifier W5	**Sterilize Rate**	99.9%
Negative Ions	≥100 millions pcs/cm^3	**Weight**	32g
Recharging Time	2.5-3 hours	**Dimension**	81×28×24mm
Work Time	30-35 hours (low gear) 20-25 hours (high gear)	**Battery Life**	Cycle charge >500 times
Rated Power	<1W	**Indicator Light**	Red light turns on during charging
Operating Conditions	-10~60°C ≤70%RH		Blue light turns on during operational
