AVICHE

NEW UPGRADE M5

Wearable air purifier

120 million	160-180	High or	Embedded	1 m³
negative ions	hours	low gear	brush	fresh air

■ **New upgrade**: The AVICHE M5 can emits 120 million negative ions from the brush on top(6 times than M1) , and can work up to 160-180 hours

■ **New function:** 【Two modes】 AVICHE M5 negative ion quantity is divided into two modes,which can be easily adjusted according to environmental requirements.

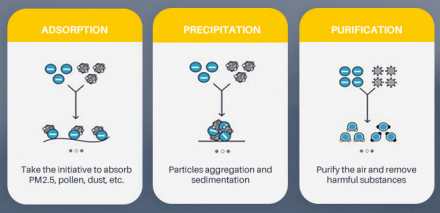
HOW IT WORKS

Micro negative ions can actively capture fine particles, like allergens,viruses,dust,make them coagulate and precipitate, and effectively remove fine dust of 2.5 microns or less in air (PM2.5) and below, thereby reducing the probability that you will inhale these bad particles and become ill.



01 120 Million negative ions

The AVICHE M5 can emits 120 million negative ions from the brush on top , it can absorb positively charged suspended particles, neutralize and settle down , and purify the air.

02 160-180 Hours

M5 can work up to 160-180 hours. After the battery capacity is expanded, it can be used continuously for nearly a week when fully charged.

Working
blue light turns on

Charging
Red light turns on

Low battery reminder
When the battery power is less than one hour, the red light will flash to remind you to charge in time

03 Two Modes

AVICHE M5 negative ion quantity is divided into two modes, which can be easily adjusted according to environmental requirements.

High-gear

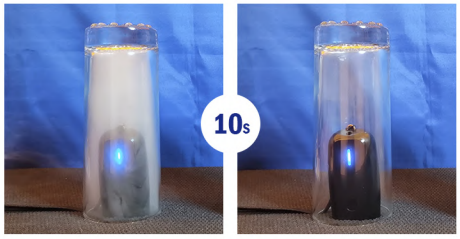
- ***120 Million*** Negaive Ions
- ***60-65*** hours

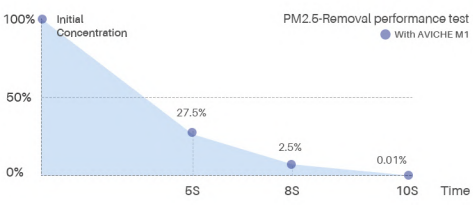
Low-gear

- ***100 Million*** Negaive Ions
- ***160-180*** hours

04 Faster purification

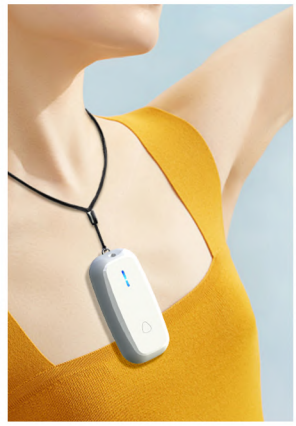
The negative ion concentration of AVICHE M5 is 6 times that of the normal M1, can remove 99.9% of smoke and PM2.5 faster





05 1m³ Fresh Air

Micro negative ions spread farther and have higher activity. They diffuse around the human body and form a protective layer of 1m3 around to provide fresh and safe air.



06 Parameter

Product Name	Wearable Air Purifier-M5
Negative Ions	≥120 millions pcs/cm³ (high gear) ≥100 millions pcs/cm³ (low gear)
Recharging Time	3-3.5 hours
Work Time	160-180 hours
Rated Power	＜0.2W
Operating Conditions	-10~60°C ≤70%RH
Battery	Lithium ion polymer battery
Battery Life	Cycle charge >500 times
Weight	48g
Product Dimension	85×40×23mm
Package Dimension	170x90x55 mm
